

Bilag 6: Resultat af vomprøveanalyser - frekvens-%

Denne liste viser resultatet af vomprøveanalyserne. Tallene angiver den procentvise forekomst af de enkelte plantestumper og andre ting fra henholdsvis bilag 1 og 3. For de enkelte områder er ligeledes angivet ANTAL, som viser hvor mange vomprøver, der er analyseret fra de enkelte områder i de enkelte måneder. Variablen MEAN angiver den gennemsnitlige frekvens-% for hele året. Listen er sorteret efter faldende årlig frekvens-% over 1 %.

Eksempel (januar i Borris-området - koder fra bilag 1):

CALL_VUL er angivet med tallet 95. Dvs. at 95% af de 21 vomprøver fra januar indeholdt CALL_VUL (Hedelyng).
